

# Giving with an open heart for open heart patients.

When it comes to matters of the heart, you want to let in as much light as possible.

## That's why Kaweah Health is upgrading the surgical lights in their Cardiac Surgery Procedure Rooms.

As the number two cardiac surgery program in California (Healthgrades®, 2022), Kaweah Health knows hearts. Our amazing cardiac doctors and nurses are just one part of this success — they need the right equipment to save lives. New state of the art surgical lights and monitors will help our cardiac surgery team shine, for the benefit of patients and their families.

New and improved surgical lighting and monitors are one important piece of cardiac care.

## Betty's story

Betty Boretti

In late 2022, Betty Boretti was diagnosed with stage two breast cancer. Two months later following a procedure, she was diagnosed with potentially fatal fluid on the heart and was immediately admitted to Kaweah Health for surgery.

The procedure was a success, and Betty is continuing with her cancer treatment. To see Betty's story scan the QR Code.

Through the amazing generosity of Betty and James Boretti, and donors like you, we can shine a bright light on better health for everyone in our community! To donate now, scan the QR code.
